DISPOSABLE STONE RETRIEVAL BALLOON CATHETER

It is used in combination with endoscope to enter the biliary tract through duodenal endoscope for biliary stone removal.

- Three lumen catheter design (guidewire lumen, liquid injection lumen, balloon lumen)
- The design of multi-stage balloon is suitable for different clinical needs.
- Equipped with Radiopaque marks on both ends of balloon, convenient for locating under X-ray.
- Unique design of tapering catheter, improves the insertion into papilla.

Good **filling** synchronization.
Clearer developing ring than same products from other supplier.

Quickly exchanged.
Sheath tube material imported from **US**.

Better symmetry of balloon's two ends and they are finished by **wire binding process**.
