DISPOSABLE HEMOSTATIC CLIPS

The product is used together with endoscope and high-frequency electric generator for the resection of gastrointestinal polyps.

SOUDON
MEDICAL

- Reopening ability, before release, radiopaque, can be repeatedly opened and closed at least five times to facilitate placement in the appropriate position.
- Integrated pre-assembled system, the product is ready to leave the factory, open the package can be applied, which is very beneficial for emergency hemostasis.
- 16mm wide claw distance is beneficial to grasp large pieces of tissue.
- The ergonomic handle can intuitively perceive the opening and closing of the gripper. Once the gripper is closed, tactile feedback can be generated to indicate that it is ready to release.

Clip length much **shorter** than other supplier's.
Clip material **NAS steel** is imported from Japan.

More secure with **Window & hole design** on clip, at the same time has multiple function that as a traction bracket.
